

## Citronnelle (Enabling room)

### Enabling Facilities:

Shower Seat	Comfortable and secure with a fully adjustable seat and arm rests. When not in use, it can be folded up.
Shelves & Towel Rack	These are fitted on the wall close to the shower seat and enable the guest to put their toiletries on the shelves for ease of washing.
Toilet Seat Extension	The extension raises the height of the toilet seat to make it easier to transfer from the wheelchair.
Toilet Arm Rests	The two arm rests are fully adjustable and fold up when transferring from the wheel chair or when not being used.
Temporary Basin and Tap	This fits on the wall next to the toilet and allows the user to wash their hands while still seated on the toilet.
Suction Grab Rails	The grab rails can be very easily attached to any flat, smooth surface, such as the wall tiles or bath surround. We have two small and two long suction rails available.
Wheel Chair Ramp and Platform	These two items allow the wheelchair user to position themselves right up close to the bed.
Shaving/make-up mirror	Placed on the vanity unit where the wheelchair user can see it.
Battery-Operated Bath Lift (kindly donated by Scott, Gaynor and Ross Bowie)	Fits securely in the bath and, by use of the waterproof remote control, allows the user to be lowered into and raised from the bath.
